

# Javier Zaia

## Full Stack Developer

San Miguel de Tucumán, Argentina  
zaiajavier1@gmail.com | GitHub: Jvier-Zaia

### PROFESSIONAL SUMMARY

---

Full Stack Developer and student of the University Degree in Programming (TUP) at UTN. Experience in cross-platform application development, enterprise desktop systems (POS), and automation (RPA). Driven by solving business problems through scalable architectures in Python, C# (.NET), and modern web technologies. Previous experience in customer service and cashier operations has provided a solid foundation in real-time problem solving and an understanding of business logic applied to software.

### TECHNICAL SKILLS

---

- **Programming Languages:** Python, C#, TypeScript, JavaScript, SQL.
- **Backend & Databases:** .NET, Node.js, FastAPI, SQLite, Pandas.
- **Frontend & UI:** React, Tailwind CSS, Bootstrap, HTML/CSS, Avalonia UI, Android.
- **Tools & Concepts:** Git, Web Scraping (Selenium, BeautifulSoup), RPA, PID Control, OOP, Design Patterns.
- **Languages:** English (B1+ Level), Spanish (Native).

### SOFTWARE PROJECTS

---

#### P3 Player (Jupyter Neon Mobile)

*Technologies: C#, .NET, Avalonia UI, Android*

 Download APK

- Implemented a networking engine to import and download music directly via external links, robustly handling asynchronous tasks, metadata extraction, and local storage.
- Developed a native Android media player with real-time procedural graphics generation (nebulas).
- Designed native Foreground Services (Media3) to ensure background playback and lock-screen notification control.
- Implemented a custom user interface and playback controls using Avalonia UI on the .NET ecosystem.

#### POS & Accounting Management System

*Technologies: Python, Tkinter, SQLite, Pandas, Matplotlib*

- Created an end-to-end desktop application for point of sale and inventory management in enterprise environments.
- Developed an integrated Business Intelligence module that generates dynamic charts and exports structured financial reports to Excel.
- Optimized database queries to efficiently handle large volumes of transactions and supplier data.

#### Gem SCADA Simulator & Moodle Bot

*Technologies: Python, Curses, Selenium, RPA*

- Designed an interactive console-based industrial simulator ("Digital Twin") with a custom-built mathematical PID Controller.
- Developed a Robotic Process Automation (RPA) bot capable of navigating complex educational platforms to massively consolidate study materials.

## WORK EXPERIENCE

---

### Customer Service & Cashier Control

*San Miguel de Tucumán*

- Responsible for cashier operations, daily balancing, and reconciliation, ensuring precision in financial transactions.
- Direct customer service, conflict resolution, and user experience optimization at the point of sale.
- This hands-on commercial experience was key for the logical design and user interface of my "POS System".

## EDUCATION

---

### University Degree in Programming (TUP)

Universidad Tecnológica Nacional (UTN) | 2026 - *Present*

### Official Frontend Development Certification

Universidad Tecnológica Nacional (UTN) | 2025
